## PROFILE

Motivated software developer skilled in Java, React, and Spring Boot. Experienced in building APIs and creating easy-to-use applications. Recently completed an NQF Level 6 qualification and worked as a frontend developer intern. Enjoys solving problems and learning new skills.

## EDUCATION

2023 - 2025

### CTU TRAINING SOLUTIONS

- IT Database Development (NQF 6) Certification

## WORK EXPERIENCE

### 2024 November - Current

Learnhall (Remote)

#### Freelance Web Developer – Learnhall (Moopark Designs Startup)

- Developed responsive React websites for Moopark Designs, an internal startup.
- Implemented session storage for state management and timers across page navigation.
- Improved UI/UX with mobile-friendly design and smooth animations.

#### Personal Projects: [portfolio-website](#)

##### Kick Land - Full-Stack Web Application

- Developed an e-commerce platform using React.js (frontend) and Spring Boot (backend).
- Implemented user authentication, product browsing, shopping cart, and order management.
- Integrated Stripe payments and Google Maps API for geolocation-based features.
- Designed database schema and optimized state management for seamless user experience.

##### Learnhall - Online Tutoring Platform

- Built a platform to connect students with tutors and make matching easier.
- Collected user data about course preferences and tutor details.
- Set up automated emails to send this data directly to the company.

## SKILLS

- Frontend Development: React.js, Redux, Material UI
- Backend Development: Java, Spring Boot, Spring Data JPA
- API's and Frameworks: Rest API, JDBC, Firebase
