PROFILE

Motivated and enthusiastic Computer Science student with a deep passion for coding and a strong desire for continuous learning. A quick learner with a dedication to staying updated with the latest industry trends. Eager to leverage technical skills and educational background to contribute effectively to software development projects.

EXPERIENCE

PYTHON DEVELOPER Brainiest Training Program

2023 - February

During my 4-week training program, I built various applications including:

- Automated Server File Transfer: Automates file collection and transfer within an internal network.
- Automated Email Sending: Sends automated emails to clients.
- Weather App: Displays real-time weather information.
- Hangman Game: A word-guessing game with a custom dictionary.
- Caesar Cipher Algorithm: Implements encryption for secure communication.
- To-Do List App: Manages daily tasks.
- Countdown App: Provides a countdown timer.
- Data Filtering Program: Extracts specific data from customer orders.

WEB DEVELOPER

Volunteer on skilled-Up-Life for Learnhall

2022 November - 2023 March

- Website Refresh: Led a complete redesign and refresh of the website.
- Landing Page: Developed a landing page to collect user data and send it via email.
- Q&A Section: Created a Q&A section to enhance user engagement on the website.
